HRT 
MISSION ADAPTABLE GEAR

WHO WE ARE

HRT has evolved from a tactical training-only company to a tactical gear company. We feel this has given us an advantage in the industry. We not only sell these products, we use them in real-world scenarios. This allows us to stay competitive and deliver innovative new products in an ever-changing industry.

We are able to deliver superior products by sourcing quality materials and demanding unsurpassed workmanship. We manage our own US nationwide logistic and support network with customer service, distribution, and end-user support. This streamlined model enables us to extend our quality pledge far beyond the factory floor. Our industry-leading LIFETIME warranty speaks for itself.

MISSION STATEMENT

HRT is committed to delivering high quality, mission adaptable tactical and lifestyle gear that won't let you down when you need it the most. Our core principles of quality, workmanship and innovation will not be compromised. This is the cornerstone of HRT.

PLATE CARRIERS

LBAC PLATE CARRIER

The LBAC “Load Bearing Adaptive Carrier” is made from 500 Denier Cordura treated with DuPont Teflon and has attachment points for an integrated Duraflex Buckle attachment system (Comes on HRT Placards) on the chest to instantly don/doff additional equipment based on your operational needs. Our proprietary dual back panel design features dual zipper sections to allow users to configure the back of the carrier with a multitude of panel options based on your specific tasks.

The quick detach buckles come standard on both sides, but can be configured for right or left side operation or completely removed. Our Tegriscummerbund is the backbone of the load carrying system, expanding real estate for additional pouches, side-plate pockets, or whatever else you might need to fulfill your mission.

- // Dual back panel zippers for user configuration
- // Quick Release shoulder and cummerbund buckles
- // 500 Denier Cordura placard Double Stitched outer carrier
- // Light-weight comfortable system for every day deployment
- // Tegriscummerbund for load bearing support
- // Air flow channel keeps wearer cool.

RAC PLATE CARRIER

The RAC Plate Carrier is a multi role versatile plate carrier that is designed to be extremely modular allowing users to navigate obstacles. The carrier is made from 500 Denier Cordura treated with DuPont Teflon and has an integrated Buckle attachment system on the chest to instantly don/doff additional equipment based on your operational needs. Our proprietary dual back panel design features dual zipper sections to allow users to configure the back of the carrier with a multitude of panel options based on your specific tasks. Our optional cummerbunds expand real estate for additional pouches, side-plate pockets, or whatever else you might need to fulfill your mission.

- // Proprietary Dual back panel zippers for user configuration
- // 500 Denier Cordura placard Double Stitched outer carrier
- // Dual YKK zipper sections to add mission specific panels
- // Buckle attachment system for modular design
- // Air flow channel keeps wearer cool.

HRAC PLATE CARRIER

The HRAC is a no-nonsense plate carrier that is designed to be extremely modular. The carrier is made from 500 Denier Cordura and has an integrated buckle attachment system for your favorite placard. You can easily don/doff additional equipment based on your operational needs. Our optional cummerbunds expand real estate for additional pouches, side-plate pockets, or whatever else you might need to fulfill your mission.

- // 500 Denier Cordura placard Double Stitched outer carrier
- // Ultra light-weight comfortable system for every day deployment
- // Easily adjustable shoulder and waist straps allow for comfort fitting
- // Air flow channel keeps wearer cool.

H HARNESS

The HRT H Harness was designed to attach to our placards or work in conjunction with other placards on the market. The simplistic yet robust design allows users to maintain a streamlined profile without the unnecessary bulk. The H harness features webbing and Velcro for hanging your Push-To-Talks or weaving cables and hydration tubes. The back features a Velcro loop panel for placement of identification or patches. The harness is made from 500 Denier Cordura and has an integrated Duraflex Buckle attachment system.

- // Duraflex Buckle attachment system to attach to GENII HRT placards with side loops
- // Attaches to most placards on the market
- // Modular design for user requirements
- // 500 Denier Cordura placard

AIR PASS BACKER

The Air Pass Backer is the perfect addition to turn your placard into a chest harness ready option. The mesh padding offers an added level of comfort and breathability. The Air Pass Backer is constructed using spacer mesh and loop Velcro and is sized to fit our placards. Like all HRT products the Air Pass Backer is backed by our LIFETIME Warranty.

- // Mesh backing for breathability
- // Small 9.25 x 5.5" (Modulus)
- // Medium 9.25 x 6" (Maximus, Response, Triple AR)

CUMMERBUNDS

2 BAND CUMMERBUND

The 2-Band Molle Cummerbund was designed with the purpose to reduce weight, but still maintain the function of a molle cummerbund. The 2-band cummerbund is roughly 2/3rds the weight of your standard cummerbunds on the market, featuring 2 rows of PALS webbing to attach your molle pouches or side plates.

- // Constructed of 500D Cordura nylon
- // Fully adjustable with rear bungee lacing system to accommodate most sizes
- // Two rows of PALS webbing on each exterior side to customize your kit

QUICK RELEASE 3 BAND CUMMERBUND

The Quick Release 3 Band Molle Cummerbund was designed with the purpose to quickly doff and don your carriers without removing your placard system. The Quick Release cummerbund featuring 3 rows of PALS webbing to attach your molle pouches or side plates. This cummerbund also features an internal pocket for soft armor or stiffener. With its universal one size fits most design this cummerbund is compatible with our RAC Plate Carrier and HRAC plate carrier along with most other carriers on the market.

- // Constructed of 500D Cordura nylon
- // Features ROC Buckles for quick release
- // Fully adjustable with rear bungee lacing system to accommodate most sizes
- // Three rows of PALS webbing on each exterior side to customize your kit

PLACARDS

MAXIMUS PLACARD

The Maximus Placard was designed to attach to all of our plate carriers or work in conjunction with the Swift Clip buckle system. Our Maximus Placard features a removeable triple 5.56 magazine insert along with two handgun magazines with polymer inserts. The Maximus Placard also features two general purpose zipper pockets on the front. The back face of the placard is a hook face to mate with a loop face of the front of a carrier or vest to keep it securely in place. The Maximus Placard is made from 500 Denier Cordura and has an integrated Swift Clip Buckle attachment system.

- // Comes with 3 Mag AR insert
- // Two General purpose pouches
- // Two pistol magazine pouches with polymer inserts
- // 500 Denier Cordura placard reinforced Stitched
- // Swift Clip Buckle attachment system to attached to carriers

TRIPLE AR PLACARD

The Triple AR Placard was designed to attach to all of our plate carriers or work in conjunction with Swift Clip Buckle system. Our Triple AR Placard holds three M4 style rifle magazines. The magazine pouches feature a polymer insert along with bungee retention to keep your magazines in place. The back face of the placard is a hook face to mate with a loop face of the front of a carrier or vest to keep it securely in place. The placard is made from 500 Denier Cordura and has an integrated Duraflex Buckle attachment system.

- // Placard Features 3 AR15 Magazine Pouches
- // Polymer Insert To Hold Magazines In Place
- // Bungee Retention For Magazines
- // 500 Denier Cordura Placard
- // Swift Clip Buckle Attachment System to attach to carriers

SHOTGUN PLACARD

The HRT Shotgun Placard was designed to attach to all of our plate carriers or work in conjunction with Swift Clip buckle system. Our Shotgun Placard holds 21 12-ga 2-3/4" shells. The carrier features three rows of 7 shells held tight by elastic bands for easy access. The back face of the placard is a hook face to mate with a loop face of the front of a carrier or vest to keep it securely in place. The Shotgun placard is made from 500 Denier Cordura and has an integrated Swift Clip Buckle attachment system.

- // Placard features 3 rows of 7 elastic sections
- // 21 shell capacity
- // Holds 1-3/4 to 2-3/4" Shells
- // 500 Denier Cordura placard
- // Swift Clip Buckle attachment system to attach to carriers

RESPONSE PLACARD

The Response Placard was designed to attach to all of our plate carriers or work in conjunction with Swift Clip Buckle system. Our Response Placard holds two M4 style rifle magazines along with two handgun magazines. The magazine pouches feature a polymer insert along with bungee retention to keep your magazines in place. The back face of the placard is a hook face to mate with a loop face of the front of a carrier or vest to keep it securely in place. The placard is made from 500 Denier Cordura and has an integrated Duraflex Buckle attachment system.

- // Placard features 2 AR15 and 2 handgun magazine pouches
- // Polymer Insert to hold magazines in place
- // Bungee retention for magazines
- // 500 Denier Cordura placard
- // Swift Clip Buckle attachment system to attach to carriers

MOLLE PLACARD

The Molle Placard was designed to attach to all of our plate carriers or work in conjunction with the Swift Clip Buckle System. Our Molle Placard features 6x3 PALS webbing. The back face of the placard is a hook face to mate with a loop face of the front of a carrier or vest to keep it securely in place. The Molle placard is made from 500 Denier Cordura and has an integrated Duraflex Buckle attachment system.

- // Placard features 6x3 PALS webbing
- // 500 Denier Cordura placard Double Stitched
- // Swift Clip Buckle attachment system to attach to carriers

MODULUS

MODULUS PLACARD

The Modulus placard was designed to attach to our HRAC and RAC plate carriers or work in conjunction with Duraflex Buckle system. The Modulus placard comes standard with an elastic AR magazine insert but can be replaced with any of HRT's inserts. The straps on the Modulus placard are height adjustable so you get the perfect length to match to HRT's or others carriers. The strap attachment system comes standard with the swift clip style buckles, but can easily be replaced to G-Hook, Molle-T or many other placard mounting options on the market.

This open top pouch design allows users to add pouches and configure the placard how you want. The front of the placard is lined with Velcro so you can easily attach and change out any of our Modulus pouches. The back face of the placard is a hook face to mate with a loop face of the front of a carrier or vest to keep it securely in place. The placard is made from 500 Denier Cordura and has an integrated Duraflex Buckle attachment system.

- // Placard features a 3 AR15 style magazine insert
- // Attaches to most chest harnesses on the market
- // Modular design for user requirements
- // Straps are height adjustable
- // Can accept Swift Clip, G-Hook, Molle-T and others
- // System does away with cumbersome MOLLE weaving
- // 500 Denier Cordura construction

MODULUS GENERAL PURPOSE POUCH

The general purpose pouch was designed to attach to our modulus placard. Our innovative pouch attachment system does away with cumbersome MOLLE weaving, allowing users to change configurations in a moment's notice without sacrificing pouch security. The General-purpose pouch features a gusseted design allowing your contents to be organized and secure perfect for mission critical items such as keys, lights, batteries, cuffs, or medical supplies. Arrange these pouches in any combination for the perfect setup.

- // Gusset zipper design for storage
- // Modular design for user requirements
- // 500 Denier Cordura

MODULUS OPEN TOP POUCH

The open top pouch was designed to attach to our modulus placard. Our innovative pouch attachment system does away with cumbersome MOLLE weaving, allowing users to change configurations in a moment's notice without sacrificing pouch security. The half sized open top pouch comes with an elastic pistol insert, perfect for your double stacked magazines, flashlights, or multi-tools. The pouch is made from 500 Denier Cordura and color matching velcro. Arrange these pouches in any combination for the perfect setup.

- // Dual Pistol insert included
- // Modular design for user requirements
- // 500 Denier Cordura
- // Works with Modulus Placard

SHOTGUN CADDY

The Shotgun Caddy attachment allows you to carry 4 additional shotgun rounds on your placard or anywhere that has loop velcro. The caddy is also great for chem lights and batteries.

- // Hold up to 4 shotgun shells
- // Holds Chem lights or batteries
- // Fits Open Top Modulus Pouch or hook velcro
- // 500 Denier Cordura construction

MODULUS OPEN TOP FLAP

The Modulus Open Top Flap was designed to attach to our Modulus open top pouch. The flap is a great addition for secondary retention or to keep your contents protected.

- // Flap for Open Top Pouch
- // Modular design for user requirements
- // 500 Denier Cordura

MODULUS INSERTS

The Modulus Pistol Insert allows you to carry 2 pistol magazines in your open top pouch for the Modulus placard. This insert allows most double stacked magazines to be inserted. The inserts are made from elastic and will hold most magazines.

- // Holds 2 double stacked pistol mags
- // Fits Open Top Modulus Pouch
- // Elastic construction to fit most mags

BACK PANELS

ZIP-ON MEDIUM PACK

The Medium Pack Zip-On Back panel was designed with the purpose of versatility. With the expandable gusset this Medium Pack can fit a S/M helmet, jacket or any other mission essential equipment.

This is the ultimate solution for swapping loadouts with one core plate carrier and numerous rear Zip-On panels to suit any mission. Secured attachment with YKK zippers and button loops, our Zip-On panels provide several options for carrying extra gear, ammunition, and equipment for your operational needs.

- // Expandable gusset for extra room
- // Size: 10"x12"x3"
- // Compatible with all RAC and LBAC Plate Carriers
- // Constructed of 500D Cordura nylon
- // YKK Zippers for durability

ZIP-ON HYDROMAX PACK

The HydroMax Pack Zip-On Back panel was designed with the purpose of versatility. The large single pocket design allows users to properly carry hydration along with supplies that can be easy access for team members. With the expandable design the HydroMax Pack can go from a compact profile to large profile capable of holding mission critical supplies like a jacket or helmet. The lower outer pocket can hold your administrative items or additional supplies with the top outer pocket is able to accept any of our Maximus line of inserts to configure the pouch for your specific needs.

This is the ultimate solution for swapping loadouts with one core plate carrier and numerous rear Zip-On panels to suit any mission.

- // Expandable design for extra room
- // External Pockets for additional organization
- // Size: 10"x12"x4"
- // Compatible with all RAC and LBAC Plate Carriers
- // Constructed of 500D Cordura nylon
- // YKK Zippers for durability

ZIP-ON GENERAL PURPOSE POUCH

The General Purpose Zip-On Half Back panel was designed with the purpose of versatility. The GP Zip-On half back panel can be configured with another HRT half back panel to meet your operational needs. This low-profile GP pouch has a large internal storage area with a front facing zipper for easy access. There is enough Velcro for your unit identification or patches.

This is the ultimate solution for swapping loadouts with one core plate carrier and numerous rear Zip-On panels to suit any mission. Secured attachment with YKK zippers and button loops, our Zip-On panels provide several options for carrying extra gear, ammunition, and equipment for your operational needs.

- // Front facing zipper for easy access
- // Velcro for unit identification or patches
- // Size: 9"x5"x1.5"
- // Compatible with RAC and LBAC Plate Carrier
- // Constructed of 500D Cordura nylon
- // YKK Zippers for durability

ZIP-ON DUAL REMOVABLE GP POUCHES

The Dual Removable General-Purpose Pouches Zip-On Half Back panel was designed with the purpose of versatility. The Dual Removable GP Pouches Zip-On half back panel can be configured with another HRT half back panel to meet your operational needs. This back panel has two independent small GP pouches that are secured by Velcro and elastic, but easily accessible when needed.

This is the ultimate solution for swapping loadouts with one core plate carrier and numerous rear Zip-On panels to suit any mission. Secured attachment with YKK zippers and button loops, our Zip-On panels provide several options for carrying extra gear, ammunition, and equipment for your operational needs.

- // Two independent GP Pouches
- // Compatible with all RAC and LBAC Plate Carriers
- // Constructed of 500D Cordura nylon
- // YKK Zippers for durability

ZIP-ON SIDE PULL MEDICAL POUCH

The Side Pull Medical Pouch Zip-On Half Back panel was designed with the purpose of versatility. The Side Pull Medical Pouch Zip-On half back panel can be configured with another HRT half back panel to meet your operational needs. This back panel features a sleeve with an insert that can be pulled out from either side of the body. The insert features 2 removable mesh pouches that can hold contents of an iFAK. Great for buddy or self-aid in high threat situations.

This is the ultimate solution for swapping loadouts with one core plate carrier and numerous rear Zip-On panels to suit any mission. Secured attachment with YKK zippers and button loops, our Zip-On panels provide several options for carrying extra gear, ammunition, and equipment for your operational needs.

- // Insert with 2 removable mesh pouches
- // Adjustable retention
- // Compatible with RAC and LBAC Plate Carriers
- // Constructed of 500D Cordura nylon

ZIP-ON HORIZONTAL FLASHBANG POUCH

The Horizontal Quad Flashbang Pouch Zip-On Half Back panel was designed with the purpose of versatility. The Horizontal Quad Flashbang Pouch Zip-On half back panel can be configured with another HRT half back panel to meet your operational needs. This back panel features four independent pockets secured by a two-stage snap and cord retention, but easily accessible when needed. This two-stage closure allows for maximum security, but quite opening for stealth operations.

This is the ultimate solution for swapping loadouts with one core plate carrier and numerous rear Zip-On panels to suit any mission. Secured attachment with YKK zippers and button loops, our Zip-On panels provide several options for carrying extra gear, ammunition, and equipment for your operational needs.

- // Four independent flashbang pouches
- // Two-Stage closure retention for quiet opening
- // Compatible with RAC and LBAC Plate Carriers
- // Constructed of 500D Cordura nylon

ZIP-ON MAXIMUS POUCH

The Maximus Pouch Zip-On Half Back panel was designed with the purpose of versatility. This back panel features a two pocket designs that allows users to organize supplies that can be easy access for team members. This back panel features two independent Pouches. The front pouch features a large zipper opening with a Velcro section for the attachment of patches or identification. The front pouch is large enough to hold your mission critical items such as first aid, administrative items or any additional items you might need. The rear pocket can be configured per the users needs with our complete line of Maximus removable inserts.

Secured attachment with YKK zippers and button loops, our Zip-On panels provide several options for carrying extra gear, ammunition, and equipment for your operational needs.

- // Front facing zipper for easy access
- // Velcro for unit identification or patches
- // Size: 9"x5"x1.5"
- // Compatible with RAC and LBAC Plate Carrier
- // Constructed of 500D Cordura nylon
- // YKK Zippers for durability

ZIP-ON MOLLE PANEL

The MOLLE Zip-On Back panel was designed with the purpose of versatility. With the 11 rows of PALS webbing and 4 columns you can attached your favorite molle gear.

This is the ultimate solution for swapping loadouts with one core plate carrier and numerous rear Zip-On panels to suit any mission. Secured attachment with YKK zippers and button loops, our Zip-On panels provide several options for carrying extra gear, ammunition, and equipment for your operational needs.

- // Size: 8"x12"
- // 11 Rows and 4 Columns
- // Compatible with all RAC and LBAC Plate Carriers
- // Constructed of 500D Cordura nylon
- // YKK Zippers for durability

BREACHING INSERT

The breaching insert was designed with the purpose of versatility. This insert allows the user to carry tools such as bolt cutters, sledge, halligan tool under the back panels. This design gives the user the option to keep their existing panels without giving up any additional space.

This is the ultimate solution for carring additional tools on the rear of our plate carrier along with the use of our numerous rear Zip-On panels to suit any mission. Secured attachment with YKK zippers and button loops, our Zip-On panels provide several options for carrying extra gear, ammunition, and equipment for your operational needs. Compatible with the RAC and LBAC Plate Carriers.

- // Adjustable for various tool lengths
- // Compatible with all RAC and LBAC Plate Carriers
- // Constructed of 500D Cordura nylon
- // YKK Zippers for durability

ZIP-ON MOLLE ADAPTER

The Zip-On Molle Adapter was designed with the purpose of versatility. This adapter allows the user to attach any HRT half or full back panels to their molle based system. Simply weave the molle adapter onto your existing carrier and add any combination of our back panels.

- // Compatible with 6 row palls webbing
- // Constructed of 500D Cordura nylon
- // YKK Zippers for durability

POUCHES / ACCESSORIES

TOURNIQUET HANGER POUCH

The TQ Pouch was designed as a universal TQ add-on to your plate carrier. It is a lightweight, durable and flexible to ensure you always have a tourniquet at the ready. The location allows you to have your tourniquet in a convenient location freeing up molle real-estate. The TQ Pouch can be mounted either under the front flap and cummerbund or inserted into your plate pocket on most carriers. It can also be mounted on the side of our placard system. It is compatible with virtually any plate carrier that has loop Velcro on the front.

- // Universal fit
- // Velcro attachment to plate carrier
- // Simplistic design

TOURNIQUET HANGER POUCH V2

The TQ Pouch V2 was designed as a universal TQ add-on to your plate carrier. The Version 2 adds the option for keeping and securing a pair of trauma shears independently of the tourniquet. It is a lightweight, durable and flexible to ensure you always have a tourniquet at the ready. The location allows you to have your tourniquet in a convenient location freeing up molle real-estate. The TQ Pouch can be mounted either under the front flap and cummerbund or inserted into your plate pocket on most carriers. It can also be mounted on the side of our placard system. It is compatible with virtually any plate carrier that has loop Velcro on the front.

- // Universal Fit
- // Left and Right Side configurable
- // Simplistic design
- // Ability to carry shears and tourniquet

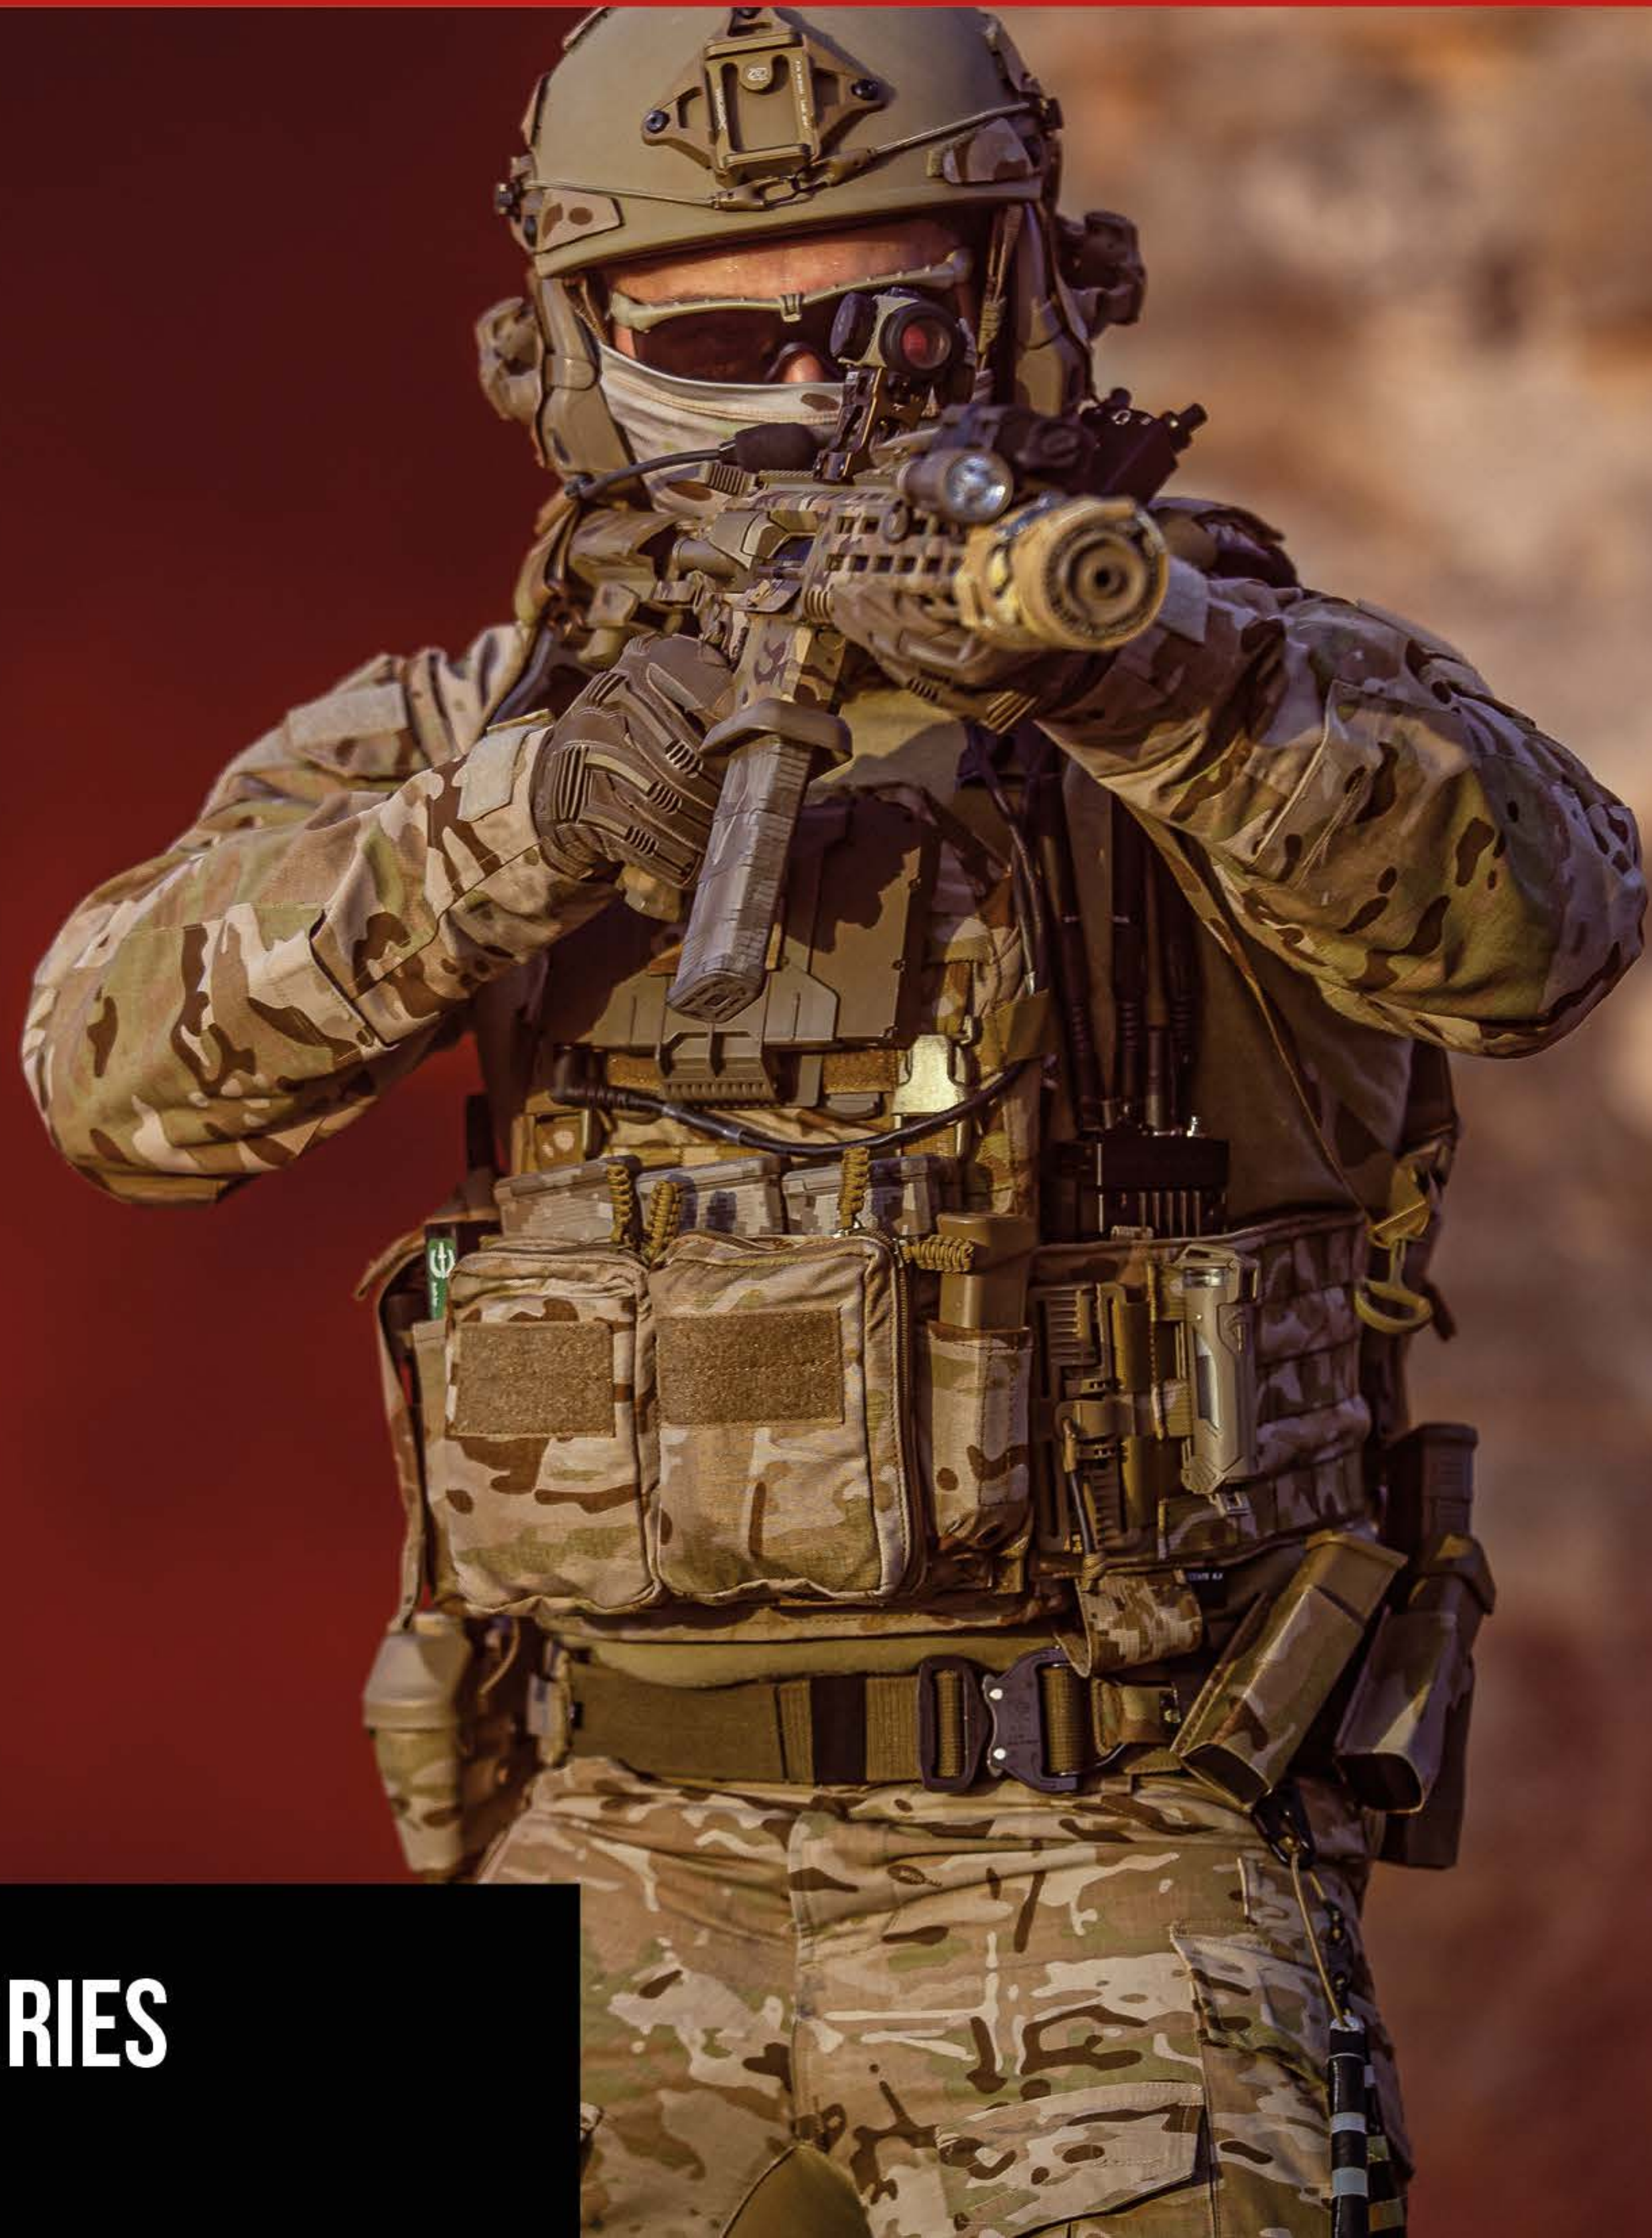

WPS MULTI HANGER POUCH

The Warrior Poet Society Multi Hanger Pouch was designed as a universal ambidextrous pouch add-on to your plate carrier. Designed in conjunction with John Lovell of WPS this pouch is a lightweight, durable and a flexible organizer to ensure you always have what you need for the job. The location allows you to have your mission essential gear in a convenient side location freeing up molle allowing you to run slick. The pouches unique design allows for user to configure the pouch for a right or left side position. The Multi Hanger pouch was designed to accept an array of items such as radios, magazines, flashbangs or any other mission specific gear. The Multi Hanger Pouch can be mounted under your cummerbund. It is compatible with virtually any plate carrier that has loop Velcro on the front of many plate pockets.

- // Reinforced stitching
- // Left and Right Side configurable
- // Multi-purpose use

SPORRAN HANGER POUCH

The Sporrان Hanger Pouch was designed as a universal utility pouch add-on to your plate carrier. It is a lightweight, durable and flexible organizer to ensure you always have what you need for the job. The location allows you to have your mission essential gear in a convenient location freeing up your sides and reducing your silhouette. The inside of the sporrان pouch offers compartments to keep your equipment secure and organized. The Sporrان Pouch can be mounted either under the front flap and cummerbund or inserted into your plate pocket on most carriers. It is compatible with virtually any plate carrier that has loop Velcro on the front and many plate pockets.

- // 500 INVISTA Denier Cordura outer carrier
- // Reinforced stitching
- // Internal compartments sealed by hook-&-loop
- // 2 Compartment Design

TACTICAL HAND WARMER

The Tactical Hand Warmer is perfect for keeping your hands warm on a cold day. With its soft shell water repellent exterior and fleece lining the hand warmer will keep your hands warm and dry. The warmer fits directly under your flap or placard system on your plate carrier. It attaches via hook and loop Velcro. This design allows the user to still run a hanger pouch or Tourniquet in front or behind the hand warmer. It features an additional pocket with easy access to store additional items or place a "air activated hand warmers" to add even more heat and comfort. The HRT Hand Warmer is the perfect design to restore dexterity in frigid conditions for maximum performance.

- // Fleece-lined
- // Soft-Shell outer material for water repellent properties
- // Elastic cuffs for fit and comfort
- // Mesh pocket to hold air activated hand warmers

PONTOONS

The Pontoon is perfect when wearing the HRAC or RAC plate carrier and more air flow or comfort is required. The pontoon comes in a set of 2 pads and easily attach via the loop on the carrier. The Pontoon provides the user with even more air flow and comfort but can easily be added or removed when needed.

These Pontoon can be added to the front of back of your carrier, or purchase 2 sets for the ultimate padding and air flow setup.

- // Ultra light-weight yet comfortable for every day deployment
- // Mesh channels for maximum air flow and comfort
- // Universal fit for Non-HRT carriers

MAXIMUS INSERTS

The Maximus insert allows you to carry different loadout configurations in your Maximus pouch or placard. These insert allows most size magazines to be inserted from pistol / SMG style magazines to larger heavy caliber magazines. Inserts include Triple AR, Heavy, SMG and Response.

The zipper insert can transform your space into an extra pocket for storage.

- // Hold up to 5 SMG Magazines
- // Hold 3 AR Magazines
- // Hold 2 AR Magazines and 2 Pistol
- // Hold 2 Heavy Magazines
- // Zipper Pocket
- // Elastic construction to fit most magazines

FIRST LINE

ARC BELT

The ARC Belt is an innovative, rigid, lightweight, low-profile first line belt system. Its laser cut woven polymer Tegriss core offers an unparalleled strength to weight ratio and is contoured which conforms to the body for maximum comfort. The laser cut sleeve system enables the user to achieve the perfect fit with the largest size adjustment range in the industry. The HRT ARC Belt pairs perfectly with our HRT ARC Mag Pouches but will accept any MOLLE style pouches and accessories you may have. The Tegriss core is made from woven polymer and the sleeves are laminated 500/1000 Denier Cordura. All belts include a G Hook.

- // Fully ambidextrous with contoured polymer core
- // Naturally hydrophobic for maritime operations
- // Fully reversible for right or left-handed shooters
- // Built-in accessory slots
- // 500/1000 Laminated Denier Cordura laser cut sleeves
- // Skin-safe hook Velcro
- // Fully MOLLE Compatible

ARC INNER BELT

The ARC Inner Belt is a low profile contoured belt intended for everyday use. The ARC Inner Belt can be used in conjunction with the ARC belt to provide a quick and secure attachment for your gun belt or can be used stand-alone to hold up your pants. The design allows for quick adjustment or a "set and forget" attachment with the G-Hook connection.

- // Contoured polymer core
- // 500 Denier Cordura reinforced stitched
- // Attachment with G-Hook connection
- // Pairs with ARC Belt

ARC POUCHES

The ARC AR Pouches were designed to be low-profile with positive retention. This effective solution is the perfect option for mounting AR and pistol style magazines on MOLLE or belts. The key feature of this pouch is its ability to maintain a precise retention utilizing the thermoplastic insert and laser cut precision assembly. The laser cut slots allow for stacking of magazines or additional gear. The AR pouch will accept most common AR15/M4 style magazines while the Pistol Pouch will accept most common 9/40 double stack magazines. The back of the pouch features several mounting locations for various belts, MOLLE or positioning. The pouch is made from laminated 500/1000 Denier Cordura

- // Thermomoulded plastic for precise retention
- // MOLLE Compatible
- // 500/1000 Laminated Denier Cordura

ARC ADAPTERS

The 30° Adapter is a Thermoplastic Composite fabric designed for heavy-duty, often dangerous work. This breakthrough material provides excellent protection against fragment, projectile or blast threats, while offering a lighter total weight than traditional thermoplastics and composites. The 30° Adapter allows HRT ARC Pistol pouches to be mounted at 30-35°, for smoother and faster reload. Compatible with both left-handed and right-handed shooters. Once properly closed, the strip will not open until it is disengaged by the user.

MOLLE Tegriss Straps is the ultimate lightweight mounting solution. Once properly closed, the strip will not open until it is disengaged by the user. The 2" strap is best suited for belts as the 3" is best suited for standard PALS webbing.

- // Made from Tegriss Thermoplastic Composite fabric

WEAPON LIGHT

PSF-MK6

The PSF-MK6 light head was designed to trump everything on the market today. With its ultra-high output LED delivering up to 90,000 candela and 1,700 lumens of blinding white light this light provides the reach and surrounding light. The light head can mount to HRT bodies or even Surefire M600DF bodies to upgrade your existing setup. PSF-Mk6 head is designed to be compatible with 2x CR123A or 1x 18350/18650. This head is backed by our unmatched Lifetime Warranty.

Constructed of lightweight aerospace aluminum, Mil-Spec hard-anodized and O-ring sealed to keep out the elements out.

- // 90,000 candela and 1,700 lumens
- // 6061 Series Alum bezel with Mil-Spec Hard Anodizing
- // Cool White 5700K emitter tint
- // 2x CR123A or 1x 18350/18650

ADAPTIVE WEAPON LIGHT SYSTEM (AWLS)

The HRT Adaptive Weapon Light System (AWLS) was designed in conjunction with Valhalla Tactical to trump everything on the market today. Utilizing the PSF-MK6 its ultra-high-output LED delivering up to 90,000 candela and 1,700 lumens of blinding white light this light provides the reach and surrounding light. The AWLS body utilizes MLOK mounting and is modular in design being able to mount on either the right or left side of your weapon. The rule breaking removeable ODA cap is sensitive in all directions replacing the need for traditional pressure pads with potential snag hazards.

The AWLS is designed to be compatible with 2x CR123A or 1x 18350/18650. This light system is backed by our Lifetime Warranty. Constructed of lightweight aerospace aluminum, Mil-Spec hard-anodized and O-ring sealed to keep out the elements out.

- // 90,000 candela and 1,700 lumens
- // 6061 Series Alum bezel with Mil-Spec Hard Anodizing
- // Cool White 5700K emitter tint
- // 2x CR123A or 1x 18350/18650
- // MLOK mounting

BODY ARMOR

SHOTSTOP III+PS ARMOR PLATE

Lightweight, multi-hit, single-curve, thinner than other poly plates, and less bulky than ceramic, the Duritium III+PS is an affordable choice for those looking for a cost-effective option to replace their heavy steel or ceramic body armor. And with an industry-leading standard 15-year warranty the choice just became even easier.

Material Type: UHMWPE (Polyethylene)
Weight (10×12 SAPI Cut): 3.2 lbs. (1.5 kg.)
Thickness (+/-0.125): 0.95 in. (2.41 cm.)
Cut: SAPI, SHOOTER
Warranty: 15 Years

SHOTSTOP III+PA MULTICURVE ARMOR PLATE

The Duritium III+PA brings together the best of all worlds as it relates to Level III+ body armor – lightweight, multi-hit, multi-curve, thin, less bulky, durable polyethylene material. And, with an industry-leading standard 15-year warranty, it's a no-brainer when it comes to cost of ownership. Protection Type/Level: U.S. Level III+, German VPAM Level 6, and NATO STANAG 2920 Level B4 tested compliant

Material Type: UHMWPE (Polyethylene)
Weight (10×12 SAPI Cut): 2.7 lbs. (1.23 kg.)
Thickness (+/-0.125): 0.7 in. (1.8 cm.)
CUT: SAPI, SHOOTER
Warranty: 15 Years

SHOTSTOP IV+HA BODY ARMOR PLATE

The Duritium IV+HS Level 4 body armor plate exceeds the NIJ requirement by 6x. Our patented Duritium® technology combines the hardness of composite alloy with the strength of Duritium® polyethylene to defeat the most powerful ammunition out there. Plus, with a 10-year warranty, you'll have protection that lasts!

Material Type: Alloy-Composite
Weight (10×12 SAPI Cut): 4.5 lbs. (2.0 kg.)
Thickness (+/-0.125): 0.9 in. (2.3 cm.)
Cut: SAPI, SHOOTER
Warranty: 10 Years

SHOTSTOP GT2 MULTICURVE ARMOR PLATE

The Duritium GT2 (Green Tip) special threat body armor from ShotStop® provides more protection with less bulk (only .6" thick) and less weight (just 3.8 lbs. for the Shooter cut) than standard Level III body armor. Plus, with a 15-year warranty, you'll have protection that lasts!, it's a no-brainer when it comes to cost of ownership. Protection Type/Level: 5.56x45mm 62 grain steel core (Green Tip), M855.

Material Type: Duritium®
Weight (10×12 SAPI Cut): 3.8 lbs. (1.72 kg.)
Thickness (+/-0.125): 0.6 in. (1.52 cm.)
CUT: SAPI
Warranty: 15 Years

SHOTSTOP IV+HS BODY ARMOR PLATE

The Duritium IV+HS Level 4 body armor plate exceeds the NIJ requirement by 6x. Our patented Duritium® technology combines the hardness of composite alloy with the strength of Duritium® polyethylene to defeat the most powerful ammunition out there. Plus, with a 10-year warranty, you'll have protection that lasts!

Material Type: Alloy-Composite
Weight (10×12 SAPI Cut): 5.4 lbs. (2.4 kg.)
Thickness (+/-0.125): 1.1 in. (2.8 cm.)
Cut: SAPI
Warranty: 10 Years
